

Specialty Diver Course

The various Specialty Diver Courses offered are an exciting way for certified divers to gain practical knowledge and experience in a specific diving activity. These courses provide the participant with a high-impact program that emphasizes both formal knowledge development and practical diving. Each course allows the participant to gain an in-depth understanding of a specific activity in recreational diving activities, while focusing on the fun of actually diving.

Additionally, five specialty diver certifications are required to attain the highest recreational certification rating in the PADI Diver program: *Master Scuba Diver*

Specialties Offered

Altitude Diver

This course covers the skills, knowledge, and techniques of diving at altitudes between 1000 feet and 10,000 feet using the Recreational Dive Planner.

Equipment Specialist

This course covers the operation and maintenance of equipment. It is not an equipment repair course.

National Geographic

This course discusses underwater exploration, navigation, and maneuvering along a delicate reef system.

Deep Diver

This course covers the skills, knowledge, planning, and techniques of diving between the depths of 60 and 130 feet.
